

CHECKLIST # G.7 FOR THE VERIFICATION OF: REGIONALLY MANUFACTURED COMPONENTS

Provide the following information.

- ❑ Product Description on the product to be evaluated including:
 1. Name, part or model number
 2. Raw material
 3. Manufacturing location

- ❑ Regionally Extracted Material information including:
 1. Location of the point of extraction, harvesting, or recovery for the raw material. Include street address and zip code. If street address is not available, include longitude and latitude coordinates.
 2. Mode of transportation used to transport the raw material from extraction or harvesting location to the manufacturing plant

- ❑ Regionally Manufactured Product information including:
 1. Detailed specifications of the product and identification of all materials used in the finished product.
 2. Location of the point of extraction, harvesting, or recovery for each raw material. Include street address and zip code. If street address is not available, include longitude and latitude coordinates.
 3. The distance between each raw material location and the manufacturing plant.
 4. Specifications on the quantities of each raw material used in the finished product.
 5. Weight of each material used in the manufacturing process for the finished product. If a material is comprised of multiple components, include a breakdown of each component by weight.
 6. The percentage (by total weight) for each raw material in relation to the weight of the finished product.
