Permit Application Form

INTRODUCTION

Coastal areas contain unique and valuable natural resources that are important to the environment, the quality of life and the economic well-being of Miami-Dade County. Competing demands on these resources must be managed in order to ensure the preservation of their ecological, commercial and recreational values.

Coastal resources in Miami-Dade County include diverse communities such as seagrass beds, mangrove forests and fringes, and coral and sponge hard bottom communities. These communities provide important habitat and nursery area for South Florida's commercial and recreational fisheries. These ecological communities also assist in the maintenance of water quality in Biscayne Bay and its adjacent tributaries by providing biological filtering of stormwater runoff from upland areas, and by slowing currents and trapping sediments to reduce erosion and increase water clarity.

Mangrove communities along the coastal areas of Biscayne Bay stabilize bottom sediments and protect shorelines from erosion and storm surge. Forest and fringe communities provide protection from storm surge and can potentially reduce damage to upland areas from hurricanes. Mangrove trees provide nesting and roosting habitat for many resident and migrating birds in addition to providing shelter and a safe nursery to growing marine life. Mangrove leaves are also a large component of the near shore food web.

Seagrass beds are a prominent feature of Biscayne Bay. Seagrasses are flowering plants that, because of their need for sunlight, live in relatively shallow water. Seagrasses are important to the overall environment for several reasons. In addition to maintaining water clarity and stabilizing bottom sediment, seagrasses provide oxygen that is necessary for animal life. Seagrass beds also provide nursery habitat and feeding grounds for all kinds of sea life. Some organisms live attached to seagrass blades while others live in their root systems, and these organisms provide food for larger fish and birds.

Hard bottom refers to those areas which have less than an inch of sediment on the underlying limestone. Soft corals like sea fans and corky sea fingers are common in hard bottom communities as well as sponges like the loggerhead sponge and the vase sponge. Hard bottom communities are home to numerous kinds of aquatic life, especially juvenile lobster and fish which use these areas as refuge as they migrate to the outer reefs. These areas are especially important in providing food to endangered sea turtles which thrive on sponges.

Human activities in the coastal areas of Miami-Dade County affect these coastal resources. Section 24-48 of the Code of Miami-Dade County provides for the protection of these resources by requiring that a Class I permit be obtained for all work in, on, over, or upon the tidal waters or coastal wetlands of Miami-Dade County, including those areas within municipalities.

Additional permits may be required for certain projects. The U.S. Army Corps of Engineers (USACE), the State of Florida Department of Environmental Protection (FDEP), and the South Florida Water Management District (SFWMD) require that permits be obtained for certain activities within Miami-Dade County's coastal areas. A list of the addresses and phone numbers of these agencies is included in this package.

COMMON QUESTIONS

What is DERM?

The Department of Environmental Resources Management (DERM) was created by the Miami-Dade County Board of County Commissioners (BCC) in 1974 in order to regulate and manage activities affecting South Florida's fragile environment. The department administers pollution control and resource protection programs as well as resource enhancement, restoration and remediation programs.

What is a Class I permit?

Section 24-48 of the Miami-Dade County Code requires that a Miami-Dade County Class I permit be obtained prior to performing any work in, on, over or upon tidal waters or coastal wetlands anywhere in Miami-Dade County including any of the municipalities located within the county. This permitting requirement applies to most work with the exception of a few specific types of minor projects listed on page 5 of this package. A Class I Permit is also required for most mangrove trimming, alteration or removal.

What other permits are needed before I can start work?

The following is a list of other agencies that may have jurisdiction over these projects and some or all require you to obtain a permit for your project. Please be advised that their involvement will depend upon the location, nature, type and size of the project. Please refer to the enclosed list of permitting contacts for names, addresses and telephone numbers:

1. Local Municipality (structural, zoning, building)
2. Miami-Dade County Building Department (if located in unincorporated Miami-Dade County)
3. South Florida Water Management District (SFWMD)
4. Florida Department of Environmental Protection (FDEP)
5. U.S. Army Corps of Engineers (USACE)

What is a short form project?

A short form project is typically a small project (such as a dock at a single family residence) in which DERM has the administrative authority to review and approve the proposed work without a public hearing.

What is a standard form project?

A standard form project is typically a large project (such as a marina or a project involving dredging or filling) which requires approval from the BCC at a public hearing. Owners of all riparian or wetland property within 300 feet of the proposed work are notified by mail prior to the hearing. Based on a review of the proposed work, DERM makes a recommendation to the BCC, which in turn decides at the hearing to approve, approve with modifications, or deny the project. If approved by the BCC, DERM then issues the permit for the project.

What is a biological assessment necessary?

In order to assess the environmental impacts of a proposed project and to determine if the project as proposed can be approved, DERM performs a biological assessment on and adjacent to the property as part of the application evaluation process. Property owners can also request that a biological assessment and/or a delineation of jurisdictional wetlands be performed for planning purposes without applying for a permit.

How much are the application and permit fees?

The application fees and permit fees are based on the cost of construction in all cases except for those limited to mangrove trimming or alteration, which are based on area of canopy proposed for trimming. Please refer to the enclosed fee schedule.

How long is the permit valid?

Most short form permits are valid for 2 years from the date of issuance, while mangrove trimming permits and most standard form permits are valid for 3 years from the date of issuance. If additional time is necessary to perform the work authorized by a Class I permit, it may be extended in 2 or 3 year increments provided the total time period of the extensions granted does not exceed 10 years.

What are DERM's objectives?

The main objective when reviewing Class I applications is to determine whether the proposed project has been designed to avoid and minimize environmental, aesthetic, and navigational impacts. For example, this may involve an assessment of the potential impacts to water quality or to plants and animals, as well as additional evaluation factors outlined in the Miami-Dade County Code. Proposed projects may need to be modified to account for these impacts.

What is a D-5 boundary?

The D-5 boundary is a theoretical boundary waterward of a property, the intent of which is to protect your neighbor's visual and physical access to the water. The boundary known as the "D-5 Triangle" is generally triangular in shape. Please refer to the enclosed diagram on page 12 of this package.

What if the project extends beyond the D-5 boundary?

Projects should be designed to be located within this boundary if at all possible. If, however, a submitted project is designed such that it extends beyond the D-5 boundary(ies), a letter(s) of consent from the adjacent property owner(s) may be necessary.

What is mitigation?

In cases where all impacts have been avoided and minimized to the greatest extent, any unavoidable impacts will need to be compensated for through mitigation. Types and amounts of mitigation will vary according to the project and the site, but typically mitigation involves natural resources habitat creation, restoration, or enhancement.

Why do I need submerged lands approval?

In order to build a structure on or over someone else's land you need to get their approval, regardless of whether the land is above or below the water. Most submerged lands in Biscayne and Dumfounding Bays and their natural tributaries including the Miami River, Little River, Oleta River and Arch Creek are owned by the State of Florida, and proprietary approval from FDEP is generally necessary prior to the issuance of a Class I permit.

DERM has been delegated the authority on behalf of FDEP to grant consent for the use of these submerged lands if the project is consistent with certain standards. During the application review process, DERM will review the project to determine if proprietary authorization may be granted by DERM on the State's behalf or if it will be necessary for the applicant to apply directly to FDEP for proprietary authorization.

Do I need a Class I permit to trim mangroves?

Most mangrove trimming or alteration projects within Miami-Dade County require a Class I permit. However, some minor trimming projects do not require permits from DERM or FDEP. The Florida Legislature enacted the 1996 Mangrove Trimming & Preservation Act in sections 403.9321 – 403.9334 of the Florida Statutes. This law regulates the trimming and alteration of mangroves statewide. However, DERM has been delegated the authority on behalf of FDEP to regulate these activities. DERM reviews proposed mangrove trimming projects on a case by case basis to determine if a permit is required or if trimming may be performed pursuant to the state permitting exemptions contained in the 1996 Mangrove Trimming & Preservation Act. This determination is based on the specific characteristics of the proposed work, such as:

- ownership of the property on either side of the mean high waterline where the trimming is proposed;
- the size of the mangrove fringe (width and length), the height of the mangrove tree(s), and type of tree to be trimmed;
- objective or purpose for the proposed mangrove trimming work;
- whether there have been any mangrove violations on or adjacent to the property;
- whether mangroves have ever been planted on or adjacent to the property;
- whether mangroves are located within a mitigation or mangrove protection area, or a conservation easement;
- whether mangroves are part of a Coastal Band Community;
- the type of trimming or alteration that is proposed; and,
- who will do the trimming.

Trimming or alteration of mangroves, such as hedging or top pruning or uplifting and windowing (depending on the percentage of mangrove canopy proposed for removal), may require mitigation and/or preparation of plans by a licensed landscape architect. Before beginning any work with mangroves, contact DERM for a courtesy review of the proposed work to determine if a Class I permit is required.

Does the Miami-Dade County Manatee Protection Plan (Plan) restrict the construction of power boat slips?

It is not the intent of the Plan to impose any additional restrictions on single family docks within Essential Habitat Areas. Single family docks shall continue to be constructed according to the existing DERM coastal construction guidelines. For multifamily residential developments within essential habitat areas, multi-slip docking facilities with more than five boat slips should be permitted to construct no more than one powerboat slip per 100 feet of owned developable shoreline. These areas generally occur along the western shoreline of Biscayne Bay and its tidal tributaries. The plan also identifies areas which are suitable locations for permitting of new or expanded powerboat docking facilities because the number and frequency of manatee sightings has been relatively lower in these areas.

EXEMPT PROJECTS

The following is a list of projects that are exempt from a Class I Permit. **Please be advised that an inspection by DERM may be required to verify that the project qualifies for and/or is performed in accordance with the applicable exemption.**

- (a) The placement of natural limerock boulder riprap waterward of an existing seawall, bulkhead or unconsolidated shoreline provided that the riprap is placed on a two (2) horizontal to one (1) vertical slope and the riprap does not extend more than ten (10) feet waterward of the mean high water line; provided, however, the Department conducts an inspection prior to the placement of the riprap and determines that said placement will not result in an adverse environmental impact to benthic communities.
- (b) Repair and/or replacement of the decking or handrails, on an existing dock or pier (excluding structural or support structures such as joists and stringers), limited to their original dimensions.
- (c) Repair and/or replacement of the tieback systems on an existing seawall or bulkhead, provided that the contractor submits an engineering plan which the Department determines meets acceptable standards for professional engineering design.
- (d) Repair and/or replacement of the cap of an existing seawall or bulkhead, provided that the contractor submits an engineering plan which the Department determines meets accepted standards for professional engineering design.
- (e) Sealing of cracks in a seawall or bulkhead cap or face.
- (f) Repair or sealing of the pilasters of an existing seawall or bulkhead.
- (g) Backfilling landward of existing seawalls or bulkheads.
- (h) Placement of riprap, gunite-filled tube, or other approved material beneath an undercut seawall or bulkhead provided that material does not extend more than two (2) feet waterward of the seawall or bulkhead.
- (i) Placement of sand-cement riprap bags at the toes of a seawall or bulkhead provided the bags do not extend more than two (2) feet or the width of two (2) standard sand-cement bags waterward of the seawall or bulkhead.
- (j) The removal of old or unused or rotting mooring piles or the removal of dilapidated docks or piers.
- (k) Trimming or cutting of a mangrove tree(s) for the exclusive purpose of conducting a land survey, provided that the area of mangroves affected by the survey line is less than three (3) feet wide and said survey is conducted by a licensed land surveyor **(no alteration)**.
- (n) Installation, repair, or replacement of marine hardware necessary to secure vessels including, but not limited to, cleats, mooring whips, chocks and mooring bits on **docks and piers**.
- (o) Construction, installation, repair, or replacement of permanent uncovered benches and/or tables on docks and piers.
- (p) Construction, installation, repair, or replacement of fenders, **except fender piles**, on **docks and piers** necessary for the protection of vessels.
- (q) Construction, installation, repair, or replacement of storage boxes, not exceeding thirty-six (36) inches in height, on docks and piers.
- (r) Construction, installation, repair, replacement of ladders on docks and piers to provide access to and from vessels and/or the water.
- (s) The placement of concrete jackets or other forms of protection on existing dock, pier or mooring piles.
- (t) The replacement of mooring piles at the same exact location as they presently exist and provided that the following criteria are adhered to:
 - (i) The mooring piles to be replaced do not protrude into the water more than twenty-five (25) percent of the width of the waterway.
 - (ii) The work will be done by a contractor holding an applicable certificate of competency.
 - (iii) The contractor shall contact the Director or the Director's designee within twenty-four (24) hours of performing the mooring piling replacement work with information on the location and the number of mooring pilings replaced.

SHORT FORM PROJECTS

In most cases, the following may be reviewed as short form projects. If, upon application, DERM determines that the project qualifies as an exempt or a standard form project, you or your agent will be notified. Please be advised that any projects that are not specifically listed as an exempt or a short form project will be reviewed as a standard form project.

When permissible, a short form permit application may be accepted by the Department of Environmental Resources Management for the following types of work:

- (1) Repair or replacement of seawalls or bulkheads at the mean high water line or at their existing location.
- (2) Construction or the placement of a single-family residence fixed or floating dock, davit, boat lift, mooring or fender pile, all of which are associated with a single family residence provided that none of the foregoing protrude into the water more than twenty-five (25) percent of the width of the waterway.
- (3) Repair, replacement or restoration of docks, piers, davits, boat lifts, mooring or fender piles, provided none of the foregoing protrude into the water more than twenty-five (25) percent of the width of the waterway.

- (4) Installation, repair or replacement of mooring buoys, when it is determined that the proposed work will not present a hazard to navigation.
- (7) Maintenance dredging projects where the dredged material is to be deposited on a self-contained upland site.
- (8) The placement of riprap in front of an existing seawall, bulkhead or shoreline, provided there is no adverse environmental impact associated with the project.
- (9) Construction of new seawalls or bulkheads at the mean high water line.
- (10) Davit installation on a dock, seawall or bulkhead.
- (11) Repair or replacement of wave baffles at their original location and dimensions.
- (12) Construction or the placement of fixed or floating docks, piers, davits, boat lifts, mooring piles and fender piles in order to create fifty (50) or less boat slips at a new or existing boat docking facility other than a single-family residence, provided that the following criteria are adhered to:
 - (a) None of the foregoing protrude into the water more than twenty-five (25) percent of the width of the waterway.
 - (b) No dredging or filling is associated or required for the project.
A boat docking facility expansion may only be accepted as a short form application if the facility has not been physically expanded during the past two (2) years.
- (13) Installation of a subaqueous cable or pipeline crossing requiring the dredging and backfilling of ten thousand (10,000) cubic yards or less of material.
- (14) Installation of aids to navigation.
- (16) Repair of bridge fender systems.
- (17) Repair or replacement of a bridge to its original dimensions or less.
- (18) Construction of artificial reefs.
- (19) Trimming or cutting or any other alteration of a mangrove tree(s) which is not a part of a coastal band community.
- (20) Trimming or cutting or any other alteration of a mangrove tree(s) for the exclusive purpose of conducting a land survey, provided the area of mangrove trees affected by the survey line is greater than three (3) feet wide and said survey is conducted by a licensed land surveyor.
- (21) Elevated boardwalks landward of the mean high water line.
- (22) Boat elevator installation on a new or existing dock, seawall or bulkhead.

REQUEST A BIOLOGICAL ASSESSMENT OR WETLAND DETERMINATION

The following is a list of items necessary for DERM to process a request for a biological assessment and/or jurisdictional wetland determination. If you have any additional questions, please contact the Coastal Permitting Program at (305) 372-6575.

LETTER OF REQUEST: The biological assessment or jurisdictional wetland determination must be requested by the **current property owner** via a letter of request. The biological assessment or jurisdictional wetland determination request letter should include:

- a legal description of the subject property
- the street address where the subject property is located
- an accurate description and drawing/sketch of the project(s) for which approval is being sought.

APPLICATION FEE: The application fee, made payable to Miami-Dade County, shall be submitted at the time of application. Please refer to the enclosed fee schedule. The application fee is non-refundable, however, if the recipient of a biological assessment applies for a Class I permit and the assessment remains valid, a \$265 credit for single family applications and a \$530 credit for multi-family applications shall be given.

APPLYING FOR A CLASS I PERMIT

The following is a list of items necessary for DERM to process a request for a Class I permit. If you have any additional questions, please contact the Coastal Permitting Program at (305) 372-6575.

PERMIT APPLICATION FORM: All fields of the application form located at the back of this package should be completed in full (please indicate N/A if not applicable). Please refer to the application form for information on what signatures are required, relative to the type of owner and applicant.

AFFIDAVIT OF OWNERSHIP AND HOLD HARMLESS AGREEMENT: If required by DERM, the affidavit located at the back of this package should be completed, signed, and notarized prior to its submittal and shall include a property description and project description.

APPLICATION FEE: The application fee, made payable to Miami-Dade County, shall be submitted at the time of application. Please refer to the enclosed fee schedule. Said fee is non-refundable. **A Class I permit application will not be processed unless the required application fee is submitted with the application form.**

PLANS AND SKETCHES: Construction plans, sketches and calculations for proposed work must be prepared by an engineer registered in the State of Florida except when the work consists solely of mangrove trimming, fender pilings, mooring pilings, mooring buoys, davits, bridge fender systems and wave baffle systems, which may be prepared by an architect registered in the State of Florida.

To submit a Class I Permit Application, plans or sketches to be submitted to DERM should minimally include:

1. Location Sketch.
2. Complete site plan, depicting all existing and proposed structures including dimensions and side setbacks.

Please be advised that the above information is solely an initial requirement, and that prior to Class I permit approval a minimum of 4 sets of Professional Engineer signed and sealed plans must be submitted. Said plans must incorporate all details as required by standards of professional engineering design and shall include the following information:

1. The location of all existing and proposed structures and any mangrove trimming must be depicted relative to a fixed point.
2. The location of the mean high water line, mean low water line and elevations of all existing and proposed structures, all referenced to the same datum.
3. Complete plan, elevation and section views of all existing and proposed structures in, on, over or upon tidal waters, coastal wetlands or mangrove areas.
4. Details of structural components such as precast members, structural connections, steel reinforcement, and expansion joints.
5. Shop drawings for prefabricated components, if available.
6. Complete description of all materials to be used.
7. The D-5 boundary lines must be depicted on the site plan.

Please be advised that additional information may be required during the plan review process.

PERFORMANCE AND MITIGATION BOND(S): Performance and mitigation bond(s) may be required in order to ensure compliance with the permit conditions and to protect the interest of the public and of landowners in the vicinity of the work. The types of bonds that are acceptable include cash, letter of credit, and assignment of collateral bonds. The required bond may remain in force for at least six (6) months after the approved completion date of the work. Paperwork for each type of bond, including IRS W-9 forms, may be required. The project manager assigned to the project will provide the paperwork for any required bonds.

LETTER(S) OF CONSENT: If the proposed project at a single family residence is designed to exceed the boundaries of the D-5 triangle, a notarized letter(s) of consent from the adjoining riparian property owner(s) may be requested. Please refer to the enclosed example on page 13 for the correct language.

STRUCTURAL APPROVAL: If the project is located within an incorporated area of Miami-Dade County (i.e. city), structural approval shall be necessary from the subject municipality. If, however, the project is located within an unincorporated area of Miami-Dade County, structural approval will be necessary from Miami-Dade County's Building Department.

ZONING APPROVAL: If the project is located within an incorporated area of Miami-Dade County (i.e. city), zoning approval shall be necessary from the subject municipality. If, however, the project is located within an unincorporated area of Miami-Dade County, zoning approval will be necessary from Miami-Dade County's Department of Planning and Zoning. For projects located within an unincorporated area, a zoning processing fee of \$158.52 (payable to the Miami-Dade County Department of Planning and Zoning) should be included with the Class I Permit Application.

SUBMERGED LANDS APPROVAL: Approval is required from the owner of the submerged lands over which any project is proposed. Most submerged lands beneath Biscayne Bay and its natural tributaries are owned by the State of Florida. Consent for the use of such lands is therefore necessary before performing any work or construction over them. DERM has been delegated the authority, on behalf of the FDEP, through the Board of Trustees of the Internal Improvement Trust Fund, to grant consent for the use of these submerged lands if the project is consistent with certain standards. In order for DERM to review your project for proprietary authorization, an additional copy of the following should be included with the Class I Permit Application:

1. 8½ x 11 Location Map
2. 8½ x 11 Project Drawing
3. Copy of Application

For information regarding this proprietary approval process, the applicant can contact FDEP at (561) 681-6600, or:

FDEP South Florida Field Office
 Division of Environmental Resource Protection
 P.O. Box 15425
 West Palm Beach, Florida 33416

**THE FOLLOWING FORMS ARE ONLY APPLICABLE WHEN PROCESSING
STANDARD FORM CLASS I PERMIT APPLICATIONS:**

ENGINEER CERTIFICATION LETTER: This letter shall be signed and sealed by the Engineer of Record for the proposed work. Please refer to the enclosed example on page 16 for the correct language.

OWNER'S STATEMENT OF PROJECT: This letter shall be signed by the owner of the subject property. Please refer to the enclosed example on page 15 for the correct language.

LIST OF ALL RIPARIAN OWNERS WITHIN 300 FEET: For the purposes of notification of hearing dates, the applicant must submit peel-off/stick-on labels with the names and addresses of all riparian or wetland property owners within a three hundred (300) foot radius of the proposed work. Said information is available from the latest county tax rolls. Please refer to the enclosed sketch on page 17.

CLASS I APPLICATION AND PERMIT FEES

<u>1. Construction Cost</u>	<u>Application Fee</u>	<u>Permitting Fee¹</u>	
\$0 - \$2,499	\$250	\$205 Short Form \$375 Standard Form	
\$2,500 - \$4,999	\$425	\$205 Short Form \$375 Standard Form	
\$5,000 - \$9,999	\$470	\$375 Short Form \$555 Standard Form	
\$10,000 - \$19,999	\$470 plus \$23 for each thousand dollars of construction cost above \$10,000	\$470 Short Form or \$625 Standard Form	plus \$25 for each thousand dollars of construction cost above \$10,000
\$20,000 - \$74,999	\$470 plus \$25 for each thousand dollars of construction cost above \$10,000	\$470 Short Form or \$625 Standard Form	plus \$25 for each thousand dollars of construction cost above \$10,000
\$75,000 - \$1,000,000	\$470 plus \$25 for each thousand dollars of construction cost above \$10,000	\$470 Short Form or \$625 Standard Form	plus \$28 for each thousand dollars of construction cost above \$10,000
Over \$1,000,000	\$28,750	\$28,750	

Class I application and permit fees are doubled for after-the-fact Class I permits.

In the event that a short form application is forwarded to the County Commission for approval, an additional fee of \$175.00 shall be collected from the applicant. If after County Commission approval is given, the applicant modifies his project or proposes additional work beyond the original boundaries or scope of the project, an additional application fee for the new work shall be assessed according to the Class I Permit fee schedule above.

- 2. **Biological Assessment²**
 - a) Single Family \$400 (for each non-contiguous parcel)
 - b) Multi-family, commercial or agricultural \$795 (for each non-contiguous parcel)
 - c) Other (those requesting establishment of a wetlands management line) \$690 (shall be added to the fees above)
- 3. Repeat assessment requiring field inspection \$265
- 4. Review of plans for exempt projects
 - a) Replacement of seawall caps \$75
 - b) Replacement of tie rods \$75
 - c) Riprap placement inspection \$170
- 5. Short Form Permit modification review³ 10% of initial fee or \$200, whichever is greater
- 6. After-the-fact modification 20% of initial fee or \$400, whichever is greater
- 7. Permit extension review 25% of permit fee or \$1000 whichever is less
- 8. Permit transfer review \$175
- 9. Variance through the Environmental Quality Control Board \$320 - \$ 1,150 (based on type requested)
- 10. Variance for prohibited fixed and floating structures \$1,240
- 11. Mangrove Trimming -

<u>Size of Area to be Trimmed</u>	<u>Application Fee</u>	<u>Permit Fee</u>	
Less than 1,000 square feet	\$225	\$225 Short Form	\$370 Standard Form
1,000 - 5,000 square feet	\$530	\$530 Short Form	\$675 Standard Form
5,001 - 10,000 square feet	\$1,280	\$1,280 Short Form	\$1,425 Standard Form
10,001 - 100,000 square feet	\$1,280 plus \$225 for each additional 10,000 square feet over 10,001 square feet	\$1,280 Short Form	\$1,425 Standard Form plus \$225 for each additional 10,000 square feet
over 100,000 square feet	\$3,305	\$3,305 Short Form	\$3,435 Standard Form

Certification of Professional Mangrove Trimmers by Miami-Dade County \$305 every 2 years
 Registration of Professional Mangrove Trimmers not Certified by Miami-Dade County \$500 annually

¹ Fees may vary slightly if, prior to issuance, the estimated cost of the project has changed from the estimate made when the permit application was submitted.

² If recipient of a biological assessment applies for a Class I Permit and the assessment remains valid, a \$265 credit for single family applications and \$530 credit for multi-family applications shall be given.

³ Modification of a standard form project may require additional fees and will be assessed according to the Class I Permit fee schedule above.

COASTAL PERMITTING CONTACTS

AVENTURA

Joanne Carr, Director of Community Development
2999 N.E. 191 Street, Aventura, FL 33180
Zoning - JoAnne Carr / Barry Glading (305) 466-8940
Building - Eduardo Krieger (305) 466-8937

BAL HARBOUR VILLAGE:

Dan Nieda, Building Official
655 - 95 Street, Bal Harbour, FL 33154
(305) 865-7525
Zoning - Dane Nieda
Structural - Ali Arbab

TOWN OF BAY HARBOR ISLANDS:

Dale Lee, Building Official
9665 Bay Harbor Terrace,
Bay Harbor Islands, FL 33154
(305) 993-1786
Zoning - Michael Vonder Mueller
Structural - Jaime M. Eisen

CORAL GABLES:

Manny Lopez, Building Official
P.O. Box 141549, Coral Gables, FL 33114-1549
(305) 460-5235 or (305) 460-5000

TOWN OF GOLDEN BEACH:

Linda Epperson, Director, Building & Zoning Dept.
1 Golden Beach Drive, Golden Beach, FL 33160
(305) 932-0744 extension
Zoning - Dan Nieda, Building Official
Structural - Jaime Eisen

INDIAN CREEK:

Samuel Kissinger, Village Manager
50 Indian Creek Dr., Indian Creek Village, FL 33154
(305) 865-4121
Zoning - Dario Gonzalez, Building Official
Structural - Angel Vargas

KEY BISCAYNE:

Eugene Santiago, Building Official, (305) 365-8902
85 West McIntyre Street, Key Biscayne, FL 33149
Zoning - William Fehr
Structural - Joseph Garcel

MIAMI:

Manny Vega (305) 416-1213
Department of Public Works
444 S.W. 2 Avenue 8th Floor, Miami, FL 33130
Zoning approval: (305) 416-1189

MIAMI BEACH:

Richard McConachie, Building Official
City Hall
1700 Convention Center Dr., Miami Beach, FL 33139
(305) 673-7610
Zoning – zoning official (305) 673-7550
Structural - Jorge Arevalo / Luis Perez

MIAMI SHORES:

Claudio Grande, Building Director
10050 N.E. 2 Avenue, Miami Shores, FL 33138
(305) 795-2204
Zoning - David Dacquisto
Structural - Nelson Lonsdale

NORTH BAY VILLAGE:

Building Dept.: 1666 Kennedy Causeway, Suite 700
Permit Dept.: 1841 Galleon Street
North Bay Village, FL 33141
(305) 754-6740

NORTH MIAMI:

Re: Class I Standard Form Permit Application Number _____, _____
_____(insert description of proposed work)

By the attached Class I Standard Form permit application with supporting documents, I,
_____(insert name), am the permit applicant / applicant's authorized (circle
one) agent and hereby request permission to perform the following: _____
_____(describe proposed
work). I understand that a Miami-Dade County Class I Standard Form Permit is
required to perform this work.

If approval is granted for the proposed work by the Board of County Commissioners,
complete and detailed plans and calculations of the proposed work shall be prepared by
an engineer registered/licensed in the State of Florida in accordance with the minimum
requirements of Chapter 24 of the Code of Miami-Dade County, Florida. Said plans and
calculations shall be subject to the review and approval of the Department of
Environmental Resources Management. The permit applicant will secure the services of
an engineer registered/licensed in the State of Florida to conduct inspections throughout
the construction period, and said engineer shall prepare all required drawings of record.
In the event that the proposed work which is the subject of this Class I Permit
application involves the cutting or trimming of a mangrove tree(s), a detailed plan of the
proposed cutting or trimming shall be prepared by a licensed landscape architect and
submitted to the Department for review and approval, and the permit applicant will
secure the services of a licensed landscape architect to supervise the trimming or
cutting.

Respectfully submitted,

(Permit Applicant's name), Permit Applicant

or

(Authorized Agent's name), Authorized Agent

ENGINEER LETTER OF CERTIFICATION

Note: Please insert applicable information

[LETTERHEAD FOR ENGINEERING FIRM]

[Date]

Miami-Dade County DERM
Class I Permitting Program
701 NW 1st Court
Miami FL, 33136

RE: Class I Permit Application Number _____, _____
_____ (insert description of proposed work)

Ladies and Gentlemen:

This letter will certify that I am an engineer registered/licensed in the State of Florida, qualified by education and experience in the area of construction, and that to the best of my knowledge and belief, the proposed work does not violate any laws of the State of Florida or any provision of the Code of Miami Dade County which may be applicable, that diligence and recognized standard practices of the engineering profession have been exercised in the engineer's design process for the proposed work, and in my opinion based upon my knowledge and belief, the following will not occur:

- a. Harmful obstruction or undesirable alteration of the natural flow of the water within the area of the proposed work.
- b. Harmful or increased erosion, shoaling of channels or stagnant areas of water. (Not applicable to class IV permits)
- c. Material injury to adjacent property.
- d. Adverse environmental impacts from changes in water quality or quantity. (Applicable to class IV permits only)

Further, I have been retained by the applicant to provide inspections throughout the construction period and to prepare a set of reproducible record prints of drawings showing changes made during the construction process based upon the marked-up prints, drawings, and other data furnished by the contractor to me.

Sincerely,

[SIGNATURE]
