
**CHECKLIST #0430 FOR THE APPROVAL OF:
INSULATION (NON ROOFING)**

- Basic Requirements Checklist.
- One set of the manufacturer's 'approval document'.
- Manufacturer's brochure with description, characteristics, use, installation, etc. of the products considered for approval.
- A statement from a certifying agency or laboratory per protocol TAS 301 that they are providing third party quality control to the manufacturer's products.

The following current laboratory tests and test reports in compliance with protocol TAS 301.

- Thermal transmission according to ASTM C518 or similar.
- Flames spread & smoke development according to ASTM E84.
- Test for radiant flux, water-vapor permeance, moisture adsorption, odor emission, corrosiveness & fungi resistance according to ASTM C665 or similar tests depending on the composition of the insulation.

Additional tests may be required due to the composition of the insulation.

Note:

If insulation contains plastic, add the plastic checklist to these requirements.
